NETWORK SECURITY INTERVIEW QUESTIONS

1. What is network?
2. What is networking?
3. Explain about types of networks.
4. Explain LAN, MAN, WAN.
5. What is topology & types of topology.
6. Differences between Bus and Star topology.
7. What is Ring topology ?
8. What Mesh topology ?
9. What is Tree topology ?
10. What are network devices ? Explain about network devices .
11. Explain about NIC, HUB, Switch.
12. Explain about router, repeater.
13. Differences between HUB and Switch.
14. What is Internet, Intranet and Extranet?
15. What is IP Address & Types of versions.
16. What is IPv4?
17. What is IPv6?
18. Differences between IPv4 and IPv6.
19. Explain about Public IP and Private IP.
20. What is WWW ?
21. What is protocol? Types of protocols.
22. What is HTTP?
23. What is HTTPS?
24. Differences between HTTP and HTTPS
25. What is TCP?
26. What is UDP?
27. Differences between TCP and UDP.
28. Explain about remote login in extranet?
29. What is OSI reference model ? types of layers in OSI model.

Prepared By **Govinda Rao Vallamsetty** -

Company Specific Technical Trainer @ PACE

30. What is Application layer ? explain about services of application layer.
31. Explain about protocols in application layer.
32. What is Presentation layer?explain about functionality of presentation layer.
33. Explain about data translation in presentation layer.
34. Explain about data compression in presentation layer.
35. Explain about data encryption in presentation layer.
36. Explain about protocols in presentation layer.
37. What is Session layer ? explain about functionality of session layer.
38. Differences between authentication and authorization.
39. What is API? Explain about NetBIOS API.
40. What is Transport layer? explain about functionality of transport layer.
41. What is Segment?
42. Explain protocols in transport layer.
43. What is Network layer? explain about functionality of network layer.
44. Explain about routing and path determination.
45. Explain about logical addressing.
46. Explain about physical addressing.
47. Differences between logical addressing and physical addressing.
48. What is MAC address?
49. What is physical layer ?
50. What is encryption algorithm? Types of encryption algorithm.
51. What is symmetric algorithm?
52. What is Asymmetric algorithm?
53. Differences between symmetric and asymmetric algorithm ?
54. Explain about public key and private key.
55. What is digital signature?
56. Explain about firewall in network security.
57. What is Domain Name System (DNS) and Explain various types of domain name servers.
58. Explain about DNS Resolver, Root DNS, TLD name Server and Authoritative DNS

server

59. Explain about TCP/IP Protocol suite with examples?

60. What is a port and explain different type's ports available in network?

61. What is network service and explain different types network services

Ex: HTTP, HTTPs, FTP, TELNET, SMTP, DNS, ICMP, POP3, ARP etc..

62. Compare TCP/UDP, Port Number and Services

	Port	Stat	Service	Server/Version
Ex:	TCP/80	OPEN	HTTP	Simple HTTP Server 6.0

63. Explain about various status of ports like establishment, Listening, Open, Close and filtered.

64. Explain the given below network command with examples

- Ipconfig and ipconfig /all (in windows) ifconfig (in kalilinux)
- Differences between ipconfig and ipconfig /all
- Ping, Hostname, getmac ipa, arp –a
- Tracert, netstat, netstat –ano, netstat –ano |findstr "port_num"
- Nslookup, subfinder
- Tasklist

65. What is Nmap and explain various advantages of Nmap.

66. Explain about various options of Nmap like –p, -sn, -sV, -sT, -O etc.

67. Explain the process about how to start a simple python Http server.

68. Explain the step by step process about ethical hacking.

69. Explain about metasploit and burpsuite techniques?

70. Explain about SQL Injection with example?

CYBER SECURITY INTERVIEW QUESTIONS

1. What is cyber security? explain advantages of cyber security.
2. Who is Hacker? Explain different types of hackers.
3. Explain about Black hat hacker, gray hat hacker and white hat hacker.
4. Differences between black hat and gray hat hackers.
5. Explain about offensive and defensive security.
6. What is Ethical hacking? Explain domains in ethical hacking.
7. Explain about Bug bounty hunter, VAPT, SOC.
8. What is attack? Explain different types of attacks.
9. Explain about passive attacks and active attacks
10. Explain about different types of passive attacks.
11. Explain about different types of active attacks.
12. Differences between passive attacks and active attacks.
13. What is cyberattack? Explain about malware.
14. What is malware? explain about different types of malware's.
15. Explain about spyware.
16. Explain about Virus.
17. Explain about Worm.
18. Explain about trojan horse.
19. Explain about ransomware.
20. Differences between virus and worm.
21. What is pretending? explain various types of attacks under pretending.
22. What is phishing attack? Explain with a real time example.
23. Explain about different types of phishing attacks.

24. Explain about spoofing.

25. Explain about social engineering.

26. Explain about pharming.
