

DBMS WITH MYSQL SQL INTERVIEW QUESTIONS

1. What is data and information and explain the differences between data and information with examples?
2. What is file management system and explain various drawbacks of FMS?
3. What is database explain with real world examples?
4. What is DBMS and explain different types of DBMS's?
5. Explain various advantages of DBMS?
6. What is RDBMS and Non-RDBMS and explain differences between RDBMS and Non-RDBMS?
7. Explain differences between DBMS and RDBMS?
8. What is MYSQL and explain differences between MYSQL and ORACLE?
9. Explain various components of DBMS software?
10. What is SQL and explain advantages of SQL language?
11. Explain the differences between SQL and NOSQL languages?
12. Explain different types of SQL commands with example queries?
13. Explain briefly about DDL commands with example queries?
14. Explain briefly about DML commands with example queries?
15. Explain briefly about TCL commands with example queries?
16. Explain the differences between Drop and Truncate Command with example queries?
17. Explain the differences between Drop and Delete with example queries?
18. Explain the differences between Delete and Truncate command with example queries?
19. Explain about commit and rollback command with example queries?
20. Explain briefly about save point command and explain advantages over commit and rollback by taking example query?
21. Explain briefly about different SQL clauses like where, from, order by and like clauses with example queries?
22. Explain about aggregate functions with example queries?
23. Explain briefly about Group by clause with example query?
24. Explain about having clause with example query and explain the differences between where and having clause?
25. Write a query to find 2nd or 3rd or 4th highest salary in employee table?
26. Explain about Limit clause in MYSQL?

27.What is window function? Explain the following functions with example queries?

- **Row_Number()**
- **Rank()**
- **Dense_Rank()**

28.What is a constraint and explain different types constraints with example queries?

29.What is Primary Key and explain with real world examples?

30.What is Foreign key explain with real world examples?

31.What are differences between primary key and foreign key with examples?

32. What is a Key and explain different types of keys in DBMS?

- **Super Key**
- **Candidate Key**
- **Alternative Key**
- **Primary Key**
- **Foreign Key**
- **Surrogate Key**

33.What is Functional Dependency and explain the following Functional Dependencies with examples?

- **Partial Functional Dependency**
- **Fully Functional Dependency**
- **Transitive Functional Dependency**
- **Multi Valued Functional Dependency**
- **Join Dependency**

34.What is Normalization and explain various advantages of Normalization?

35.What is Normal form and explain different types of normal forms?

36.Explain briefly about **1NF, 2NF, 3NF, 3.5NF or BCNF, 4NF, and 5NF** with example databases?
